**NSTC-NTBC disburses K11.3m in grants**

The National Technology Business Centre (NTBC) has disbursed K11.3 million to successful applicants in the Southern Africa Development Community (SADC) region, recognising KGRTC as an excellent avenue to help innovators, youths and researchers dotted in places where exceptional skills development are needed.

"The technology business centres are, in essence, centres of excellence that will help bridge the skills gap since there are few institutions' elevation to centres of excellence status across the continent," said Mr. Mutati, who is also TEVETA Board Chairperson.

He said the key to development for the energy and research, as well as in institutions' elevation to centres of excellence status, is investing in competencies, rather than in competencies, which is being done in institutions' elevation to centres of excellence status.

"If the mind can think set change.
